PROFESSIONAL SUMMARY

A Full-Stack Web Developer focused on building scalable, database-driven web applications with clean architecture and performance-first logic.

My development process follows: System Design | Database Architecture | Backend Engineering | Frontend Implementation - ensuring structured code, efficient performance, and intuitive user experience.

SKILLS

Front-end & UI:

HTML5, CSS3, Sass(SCSS), Bootstrap 5, Tailwind CSS, JavaScript

Backend & Architecture:

PHP, Laravel, CodeIgniter, MySQL, WordPress

Tools & Ecosystem:

VS Code, G Analytics, Search Console, SEMrush, Figma, Adobe Photoshop, Adobe Illustrator, Canva

DevOps:

Git, GitHub, GitLab, CI/CD

WORK EXPERIENCE

Web Developer

01/2025 – Present

Freelance/Self-Employed

- Developed responsive and database-driven websites for clients
- Managed hosting and deployment via cPanel

EDUCATION

B.Sc. in Computer Science & Engineering

01/2024 – Present

University of Information Technology & Sciences

Dhaka, Bangladesh

PROJECTS

Grocery E-Commerce Platform 🔗

Built a comprehensive e-commerce website with product catalog, shopping cart, secure checkout, order management, customer authentication, and admin dashboard.

- Designed responsive UI using Laravel Blades, Bootstrap, CSS, Sass, JavaScript
- Implemented product management, category/subcategory system, cart logic, and order processing
- Built backend with Laravel & MySQL database integration, including payment gateways.

Education Consultancy Platform 🔗

Developed a dynamic education consultancy website offering services like study abroad assistance, career counseling, and visa processing.

- Designed responsive UI using custom CSS, AOS animations, and Swiper.js for interactive elements
- Enhanced user experience with interactive forms and dynamic content rendering
- Integrated PHPMailer for secure email communication and optimized SEO with structured data

House Rental System 🔗

Developed a dynamic rental property listing website offering features like property search, filtering, and detailed property information.

- Designed responsive UI using custom CSS, Swiper.js, and Font Awesome for interactive elements
- Integrated PHP and MySQL for dynamic property listings, pagination, and database connectivity
- Implemented a seamless property browsing experience with mobile-friendly design adjustments
